Hospital Transformation

Hospital Contract

Hospital Primary Care Mental Health Home Care Contract

Healthcare Network

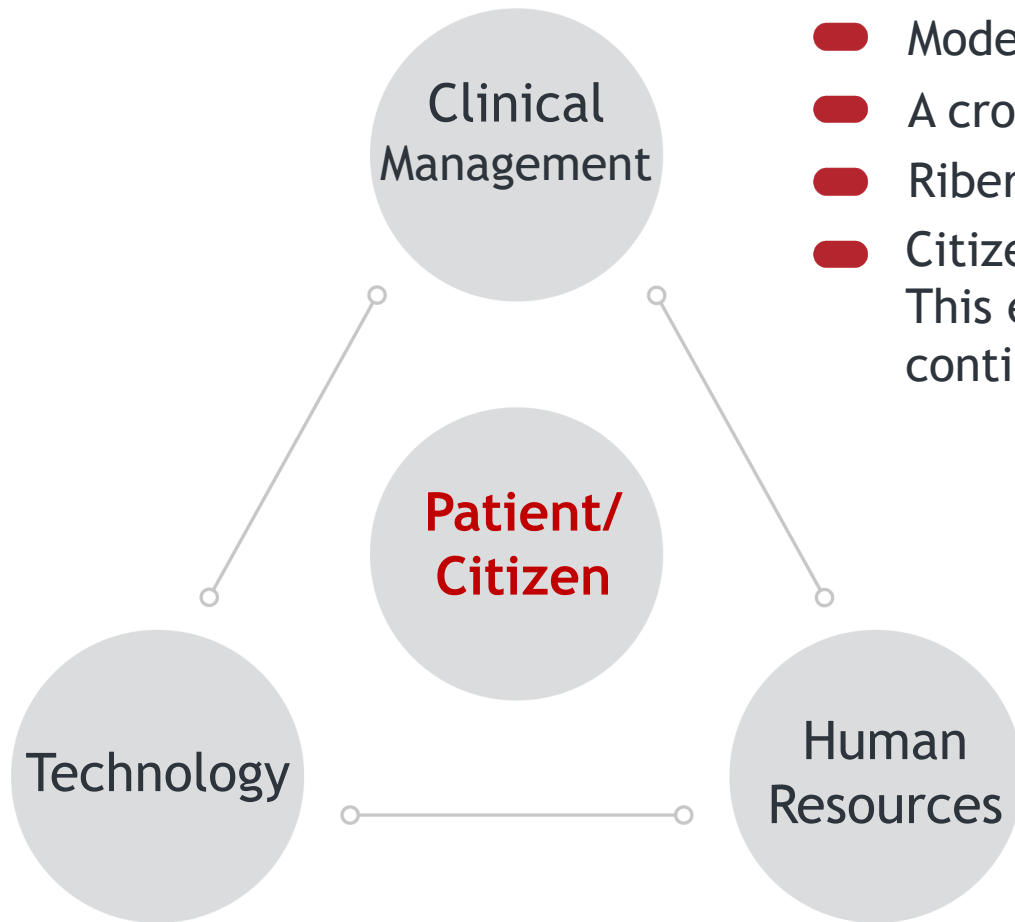

- System Fragmentation
- Lack of previous experience in PPP models
- Capitated model
- Difficulty to implement new strategies

- Integration
- Cultural Change in decision-makers
- Resistance to change
- Lack of experience in teamwork

- Benchmarking
- Best practices
- Shared services
- PHM
- Reduced clinical variability

RSG-Triangle of Success

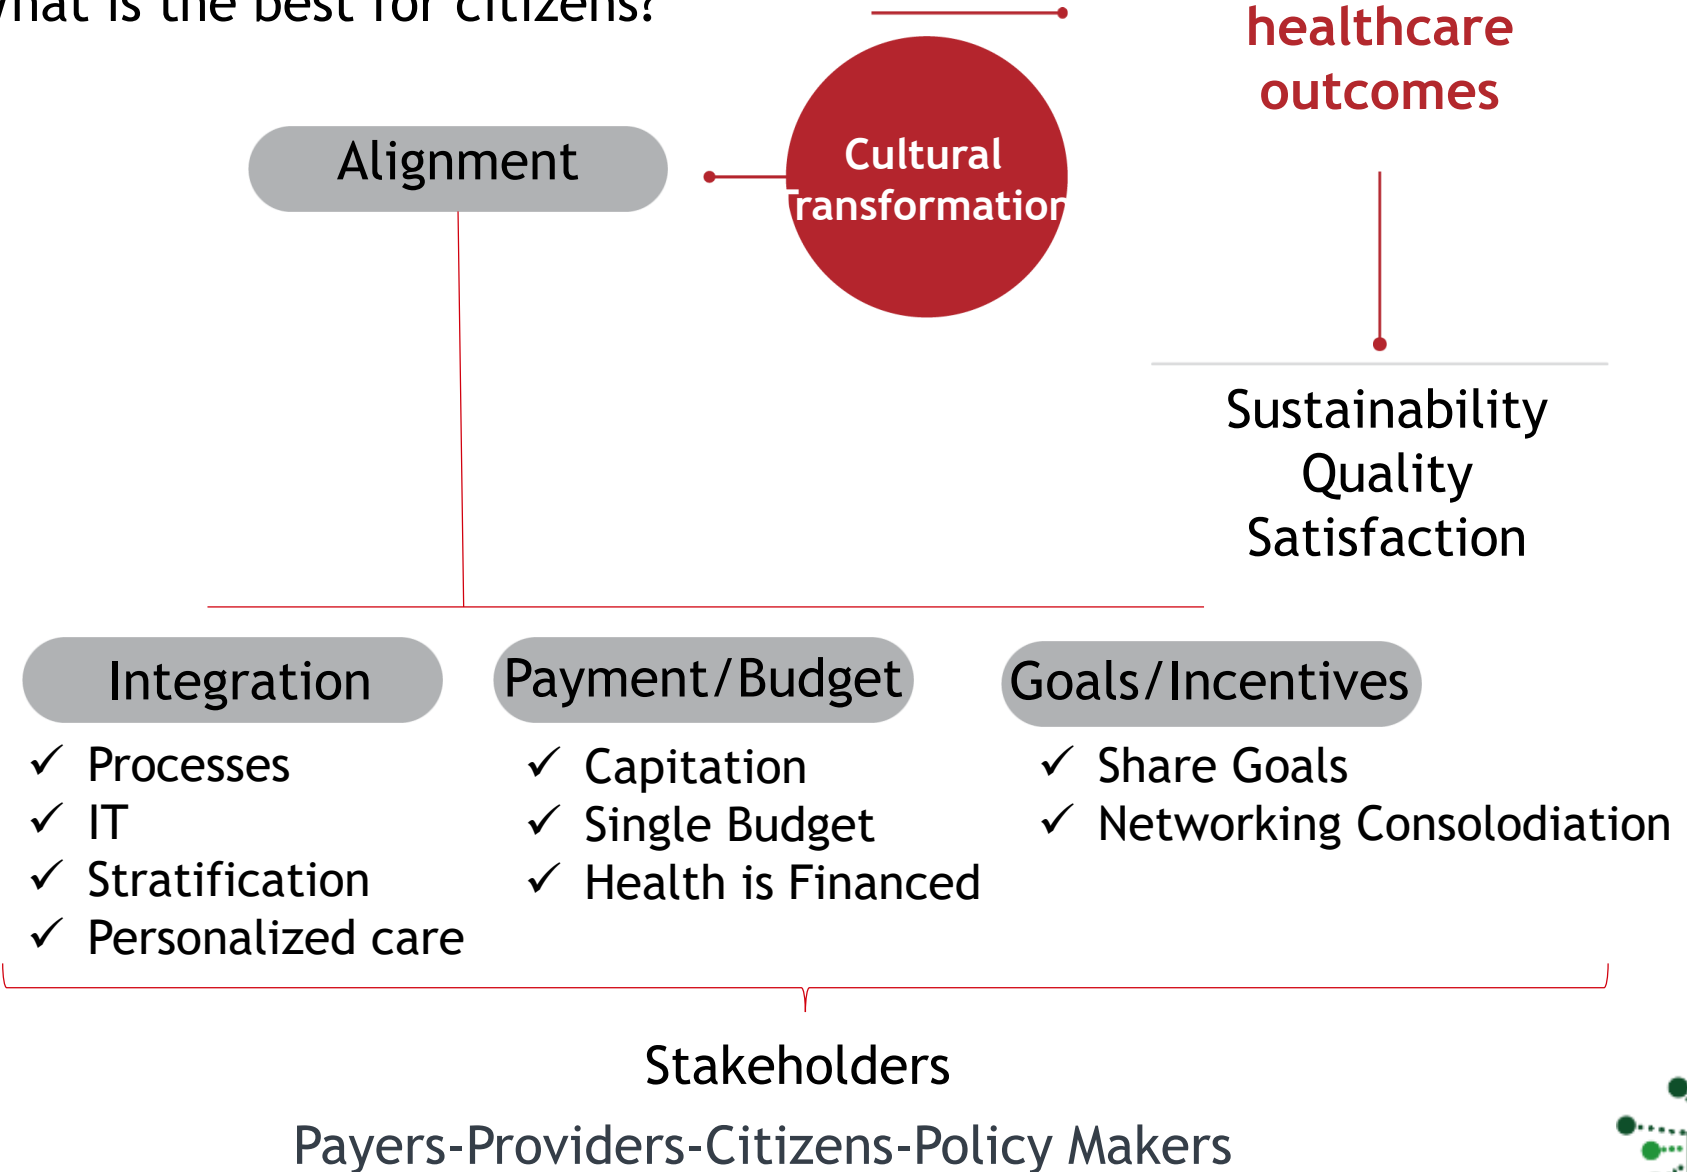

- A Citizen-centered clinical management Strategy
- Modern HR Management
- A cross-functional Information System
- Ribera Salud Triangle of Success
- Citizens are the heart of the Alzira Model. This elements are self-reinforcing in a continuous process of improvement

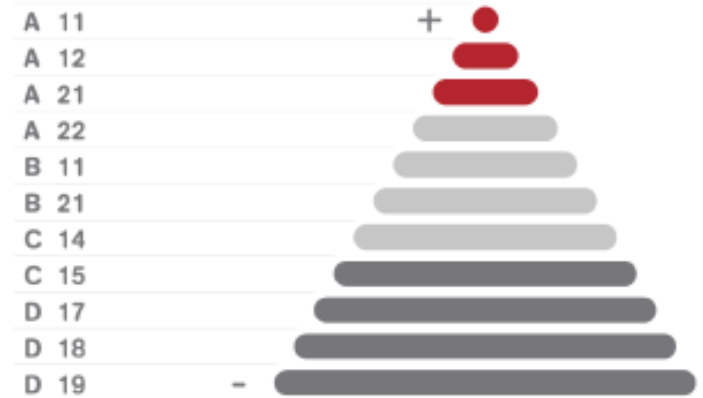

Population Health Management

What is the best for citizens?

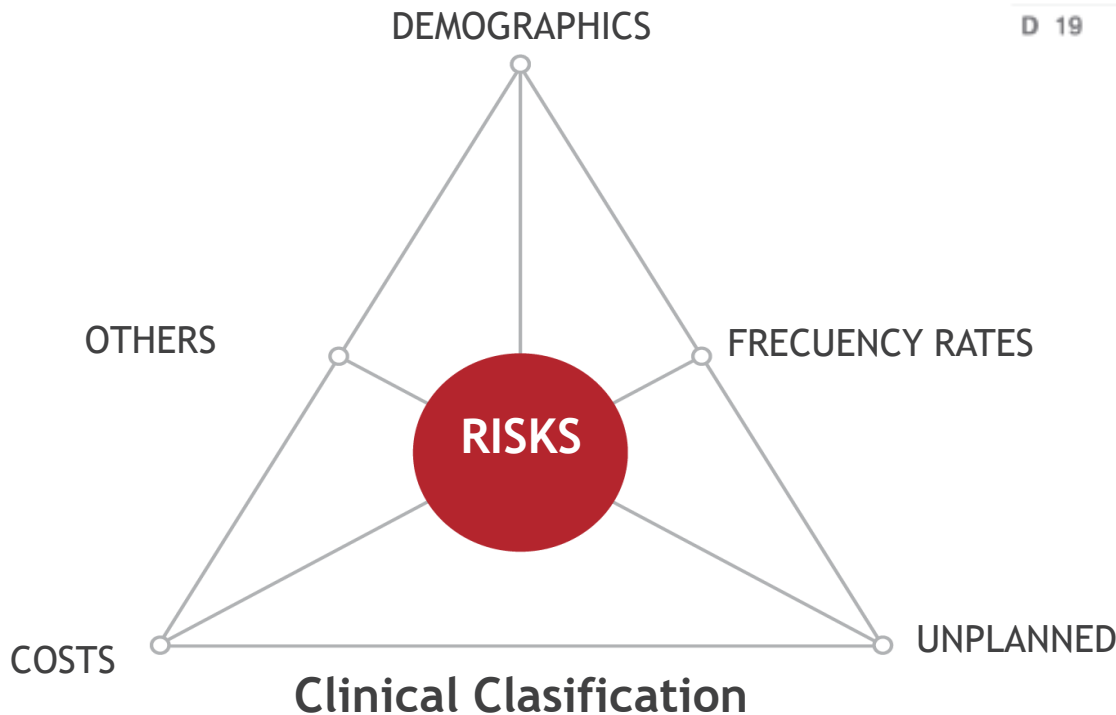

Transformation and Innovation

- ✓ RSG clinical classification based on risk adjustment
- ✓ Own population pyramid
- ✓ Better information for more targeted care

Level of Risk

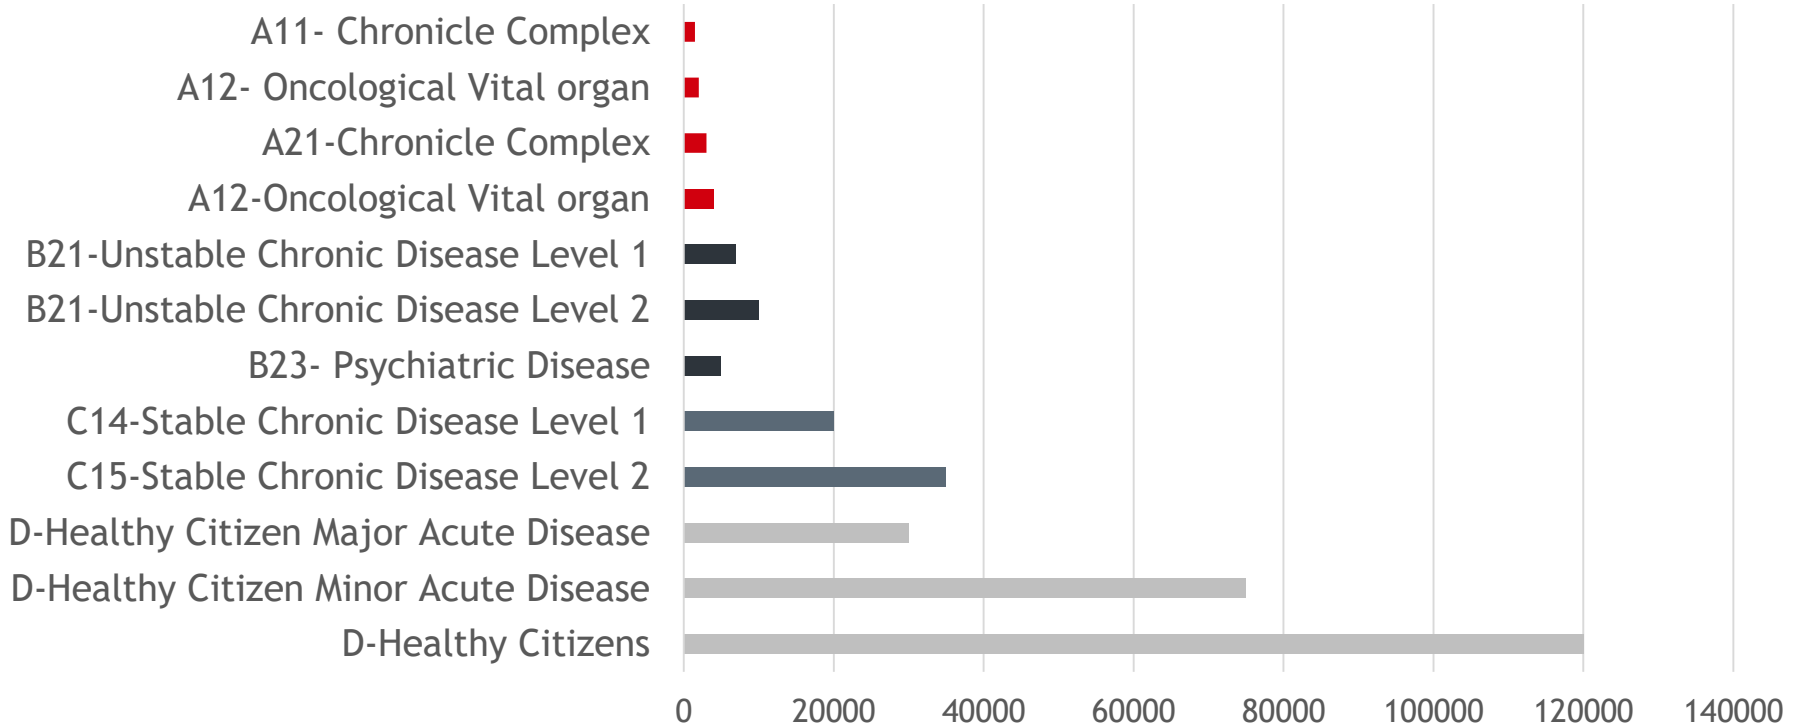

More proactive and Targeted Care: Population Pyramid

RSG	DEMOGRAPHIC			UTILIZATION LEVEL			UNPLANNED INPATIENT		COST	OTHER		
	PATIENTS	%PATIENT	AGE	INPATIENT	EMERGENCY	OUTPATIENT	>0	%RSG	IP DAYS	COST	RUB	FRAILTY

Transformation and Innovation

Number Of Patients

Transformation and Innovation

Average Cost Per Patient

Transformation and Innovation: Population and Cost Dispersion

ribera salud grupo

More proactive and Targeted Care: Cost Per Patient

ribera salud grupo

Transformation and Innovation: Pyramid of Risk

Level of Risk	Communication	Professional in Charge
<p>Level III: Chronic Patient Pluripathological</p>	High Complexity Care at home	Case mngt nurses Basic area-Care Center
Case Management	Face to face at HC centre	UBA Nurses
Level II: High Risk Chronic Patient Disease Management	Face to face at HC centre	UBA Nurses
Level I: Chronic Patient newly Diagnosed Self-Care and Health Education	Health Portal/ Phone	UBA Nurses/Care Centre
Level 0: Health Population Promotion and Prevention	Health Portal	Care Centre

Transformation and Innovation: Tools

True Care is a Managed Care Tool

- Assign pre-defined care plans to patients based on screening of “risk criteria”
- Action Plan

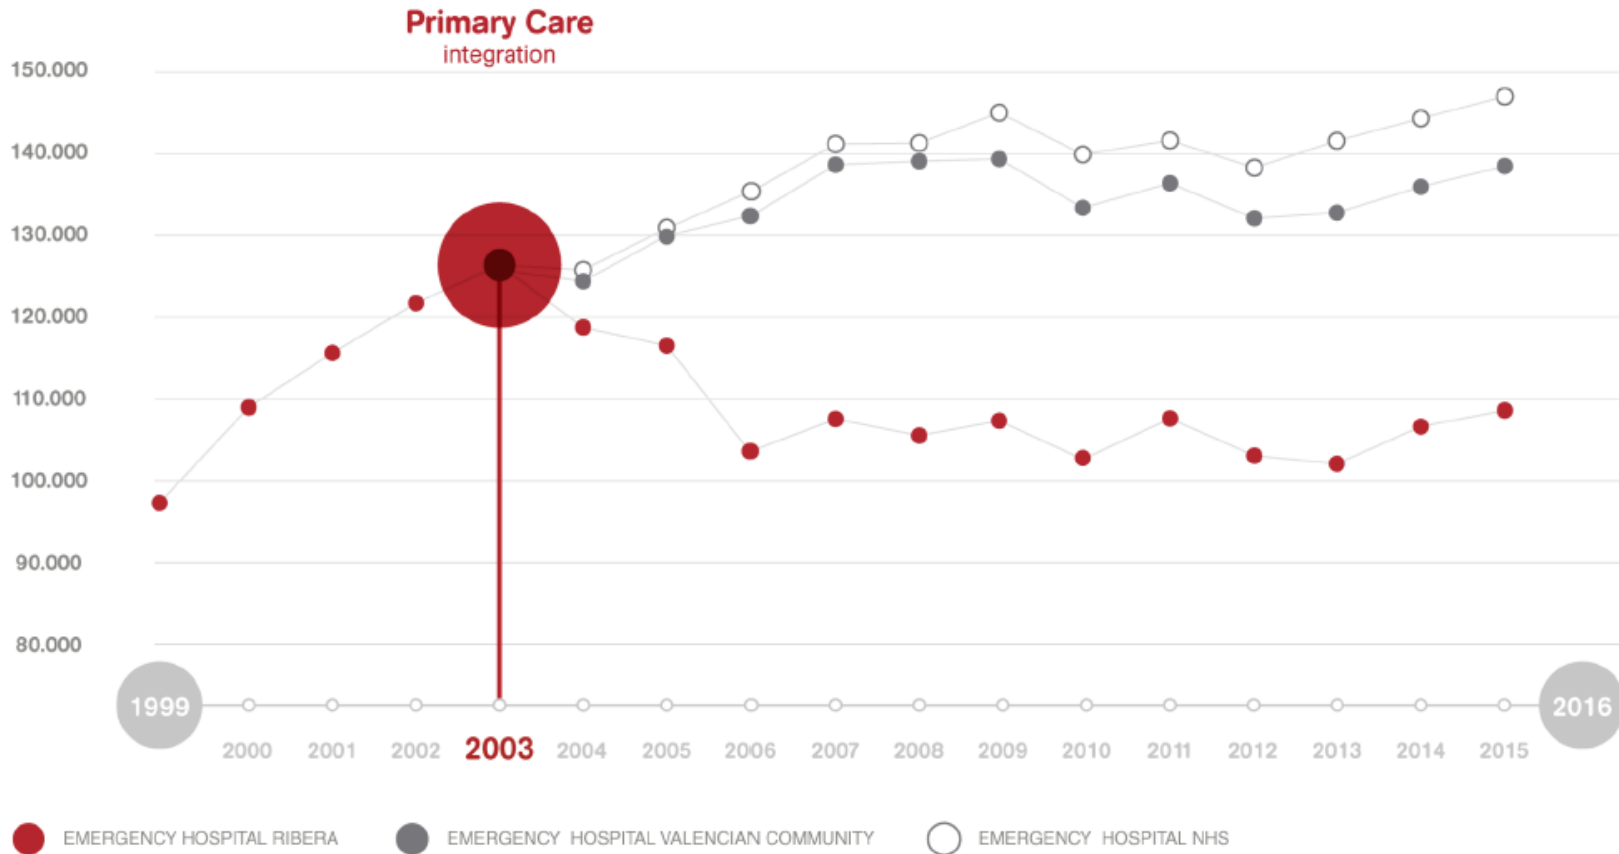

Health Portal will be the main means of communications for the level 0 of the population and a big part of population in level 1

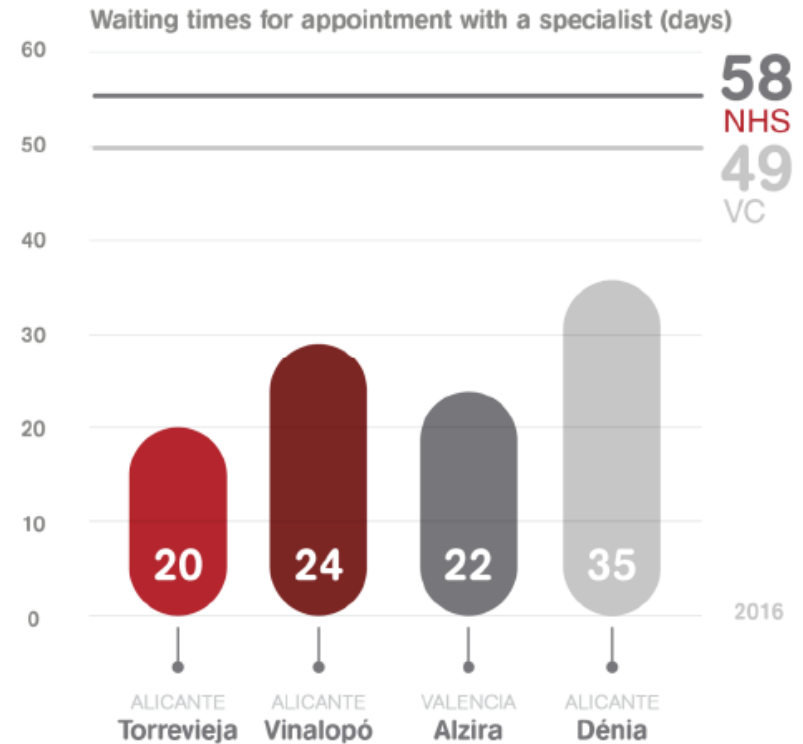

Some Figures: Emergency Evolution

Some Figures: Waiting List Results

ribera salud grupo

Some Figures: Indicators

INDICATORS	Ribera Salud	Valencian Community
● — Diabetes Type II Control	59,79%	50,15%
● — Outpatient Surgery Substitution Rate	78,48%	64,98%
● — Rate of Low - risk section	3,53%	7,76%
● — Hip Fracture Operate within 48 hours	90,2%	57,02%

Some Figures: Indicators

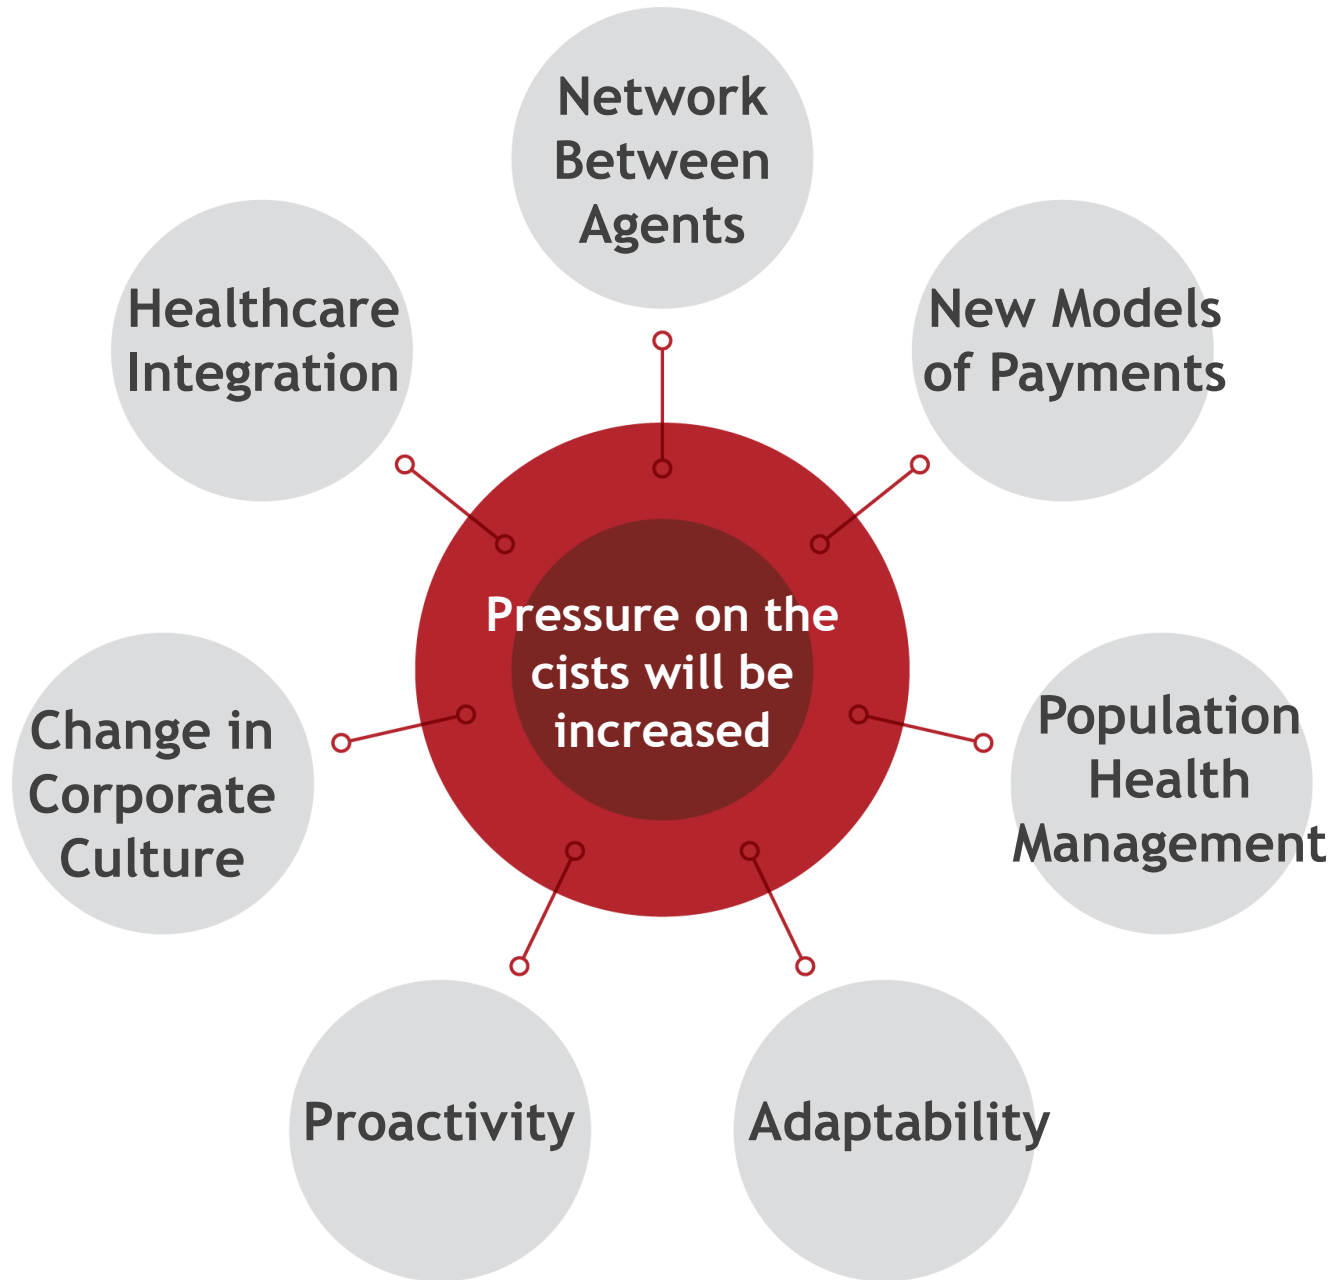

Measures	Before	After	Variation
●—• 1 st Outpatient Visit	5688	5190	8,76%
●—• Ongoing Outpatient Visit	15700	16122	2,69%
●—• Hospital Emergencies	6752	5680	-15,88%
●—• Hospital Admissions	2933	2123	-27,62%
●—• Hospital Re-Admissions	266	197	-25,94%

CONCLUSIONS

THANK YOU
